L'ellipse joue un double rôle :  
- elle aide le consommateur à mieux évaluer la dose qu'il consomme.  
- elle permet aux professionnels de verser en un clin d'œil deux capacités différentes : une dose de 12,5 cl de vin (ce qui correspond à 6 verres dans une bouteille) ou une dose de 14,5 cl.

The role of this ellipsis is twofold :  
- it enables professionals to pour two different capacities instantly : a 12.5cl wine measure (the equivalent of 6 glasses per bottle) or a 14.5cl measure.  
- it helps consumers to keep a tag on the volume of alcohol they drink.

## Le verre trempé - Tempering

Les problèmes de casse sont pour les professionnels récurrents. **Pour augmenter de 10 à 50 fois la durée des produits**, notre service recherche et développement a mis au point en 1958 un **traitement technique appelé «la trempé»**. Ce traitement confère aux produits **une excellente résistance aux chocs mécaniques, thermiques et un bon maintien de la chaleur**. Nos articles sont trempés dans leur globalité.

Zerbrechlichkeit ist für das Hotel- und Gaststättengewerbe ein sich wiederholendes Problem. **Um die Lebensdauer der Produkte 10- bis 50-mal zu verlängern**, vervollkommnete unsere F&E-Abteilung im Jahre 1958 eine **technische Behandlung** namens «Härtung». Diese Behandlung verleiht den Produkten **eine ausgezeichnete Festigkeit gegenüber mechanischen und thermischen Beanspruchungen, sowie gute Warmhalteigenschaften**. Alle unsere Artikel sind gehärtet.

Les articles «trempés» offrent des avantages non négligeables fortement appréciés des utilisateurs finaux :  
Die «gehärteten» Artikel bieten erhebliche Vorteile, die von den Endnutzern sehr geschätzt werden :

• **Economie dans le budget de réassort** : un verre trempé peut être jusqu'à **5 fois plus résistant** qu'un article n'ayant pas subi de traitements spéciaux.

• **Einsparungen im Nachbestellbudget** : ein gehärtetes Glas kann bis zu **5-mal widerstandsfähiger** sein als ein Artikel, ohne Spezialbehandlungen.

• **Les produits trempés résistent à des écarts de température de 135°C** : ils passent ainsi du four (ou de la salamandre) à l'eau froide sans risque de casse.

• **Die gehärteten Produkte widerstehen Temperaturunterschieden von 135°C** : sie gelangen folglich ohne Bruchrisiko aus dem Backofen (oder Dauerbrandofen) ins kalte Spülwasser.

• **un service en salle sécurisé** : lorsqu'un choc ou une succession de chocs réussissent à percer la carapace extérieure du verre trempé, celui-ci se casse en **morceaux de verres peu tranchants**.

• **Sicherheit für den Service im Speisesaal** : Bei Beschädigung des Glases zerspringt das Glas durch den Prozess der Härtung in **wenig scharfe Splitter**.

**Des tables élégantes** : la trempé confère à l'article une résistance supplémentaire ce qui nous évite de fabriquer des produits à épaisseur de verre importante. La force d'Arcoroc réside dans l'**alliance de l'élégance et de la solidité**.

For professionals, breakage problems are a regular occurrence. **In order to increase the life of products by 10 to 15 times**, in 1958, our research and development department perfected a **technical process known as «tempering»**. This process provides products with **excellent resistance to heat and mechanical shock, and ensures that they can effectively retain warmth**. Our items are fully tempered.

Las roturas son un problema habitual para los profesionales. **Para aumentar de 10 a 50 veces la duración de los productos**, nuestro servicio de investigación, desarrollo y perfeccionó en 1958 un **tratamiento técnico denominado «templado»**. Este tratamiento confiere a los productos una **excelente resistencia a los choques mecánicos y térmicos, así como una buena conservación del calor**. Nuestros artículos se templan en su totalidad.

«Tempered» items offer significant advantages to hugely appreciative end users :

Los artículos «templados» ofrecen ventajas importantes muy apreciadas por los usuarios finales :

• **Savings in terms of budget and restocking costs** : a tempered glass can be up to **5 times more resistant** than an item that has not undergone any specific treatment process

• **Ahorro en el presupuesto de reposición** : el vidrio templado puede ser hasta **5 veces más resistente** que un artículo que no haya sido sometido a este tratamiento.

• **Tempered products are resistant to variations in temperature of 135°C** : they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage

• **Los productos templados resisten diferencias de temperatura de 135°C** : esto permite que pasen del horno (o de la plancha) al agua fría sin riesgo de rotura

• **Completely safe for table service** : when a shock or series of shocks manages to rupture the exterior shell of the tempered glass, the resulting **glass shards are not sharp to the touch**.

• **Mayor seguridad para el servicio de sala** : cuando un choque o una sucesión de ellos consiguen quebrar la capa externa del vidrio templado, éste se rompe en **fragmentos de vidrio poco afilados**, de manera que existe menos riesgo de corte para los usuarios.

**For elegance** : tempering provides the item with extra resistance, which means that we do not have to manufacture products with significant glass thickness. The advantage of Arcoroc resides in the fact that it **combines elegance and strength**.

**Mesas elegantes** : el templado confiere al artículo una resistencia adicional que nos evita tener que fabricar productos con un grosor de vidrio elevado. La fuerza de Arcoroc reside en la **alianza de la elegancia y la solidez**.

These logos which appear on catalogs and packagings, indicate that these items are made of tempering.

Los logotipos que aparecen en los catálogos y embalajes indican que referencias están hechas en templados.
